tema, Ghana

📇 PROFILE

Dedicated **Front-End Engineer** with expertise in **React, JavaScript (ES6+), HTML5, and modern CSS**. Skilled at developing responsive, accessible web applications with a **component-based architecture**, clean code practices, and performance optimization. Leveraging **3+ years of client-facing experience** as a sales representative, I bring strong user empathy, communication skills, and the ability to translate business requirements into intuitive UI solutions. Passionate about building seamless user experiences and collaborating on large-scale projects within innovative technology teams.

💼 PROFESSIONAL EXPERIENCE

Front-End Developer
Self-Employed / Remote
11/2024 – present | Golfcity, Ghana

- Developed **4 production-grade web applications** — including a real estate marketplace, movie database, e-commerce platform, and news aggregator — using **React, JavaScript (ES6+), HTML5, and CSS3**.
- Engineered **responsive UI components** with mobile-first design principles, ensuring consistent cross-browser functionality and improved accessibility.
- Implemented **state management solutions** for dynamic user interfaces in booking systems and content platforms, improving scalability and user engagement.

WaterKing
Sales Representative
08/2019 – present | Golfcity, Ghana

- Translated customer needs into tailored product solutions, a skill directly applicable to designing intuitive and user-centered web interfaces.
- Consistently achieved and exceeded monthly sales targets through clear communication and data-driven decision-making.
- Built strong client relationships by listening and responding to feedback, reflecting a user-focused approach similar to modern UI/UX practices.
- Collaborated with team members to optimize sales strategies, developing transferable problem-solving and teamwork skills valuable in frontend development.
